

RAILSIGHT: DEMAND TRACE

“Hey—where’s my container?” Questions like these come up every day in busy offices. When a customer is waiting on the end of the line, you need immediate and accurate answers. With just a few clicks you can know the exact time and date a shipment or equipment moved to a different location.

RAILSIGHT DEMAND TRACE DELIVERS DATA ON DEMAND

RailSight Demand Trace has the answers. Powered by the only single-source provider for freight rail data, the solution gives you access to the complete lifecycle of your shipments and equipment for more informed decisions and better planning. RailSight Demand Trace eliminates the need for multiple accounts, saving you time, headaches and worry.

FLEXIBILITY DESIGNED FOR YOUR SUPPLY CHAIN

RailSight Demand Trace gives you the freedom and flexibility to run as many traces as your business needs require. With three trace types – last event, new event and historical events – and multiple reporting options, you get just the data you need, when you need it.

Create traces for up to 1,000 pieces of equipment at once. Run a new event trace to see all events reported since your last trace. Need a deeper view into the past? Run a historical event trace to see all events as far back as 90 days. Then, choose whether to save the trace or schedule it for later. With RailSight Demand Trace, you

are only billed for the responses you receive.

AN AFFORDABLE, EASY-TO-USE SOLUTION

Designed for businesses large and small, RailSight Demand Trace empowers your business users with its self-service tracing capabilities. As an easy-to-use, hosted solution, you don't have to rely on your IT department for any special set-ups. You can be up and running in hours so you can stop guessing and start knowing.

CUSTOMIZABLE DATA

Focus on the data most important to you with 12 reporting options such as current location, ETA, SPLCs, destination and event translation. Event filters enable you to refine your trace report further so you see only the events you want, eliminating distracting clutter from your logistics planning. Use the solution's automatic scheduling feature to streamline fleet planning. Your preferred traces will automatically run and arrive in your inbox so you can focus on managing your business and serving your customers.

RAILSIGHT DEMAND TRACE GIVES YOU:

- Complete visibility for the lifecycle of your shipments and equipment
- A dedicated web-based portal
- An easy-to-use hosted solution with no IT set-ups or special equipment needed
- Unlimited trace reporting
- Twelve format options and multiple event filters
- Ability to schedule traces to run daily, weekly and monthly
- Automatic delivery to you and others via email, FTP, CSV or PDF

BUILT BY THE INDUSTRY LEADER IN RAIL DATA

RailSight Demand Trace draws its power from the RailSight CLM engine, giving you immediate access to 9.8 million rail events each day from more than 600 rail carriers throughout North America. Railinc is the proven industry leader in rail data for more than 30 years, making RailSight Demand Trace the most complete and up-to-date data available for your supply chain needs.
